Primary care plays a crucial role in cancer screening. Patients are more likely to participate in screening if it has been recommended by a health professional. Cervical screening is going through a period of unprecedented change, and bowel cancer screening is continuing with its national rollout, so change is inevitable – the national programs are changing, and new technologies and research provide us with insight into the future of cancer screening. Now is the perfect time to garner a better understanding of what these changes are and how they will impact primary care.

This free workshop will provide an update for GPs on upcoming changes to the program, how to prepare your practice for the transition and support improvements in participation.

### Speakers

**Professor Ian Hammond**  
Chair, Steering Committee for the Renewal Implementation Project, National Cervical Screening Program

**Nerida Steel**  
Program Manager, WA Cervical Cancer Prevention Program

**Dr Hooi Ee**  
Gastroenterologist  
NBCSP clinical lead in WA

### Additional topics:
- Are you practice ready?
- Health Pathways

### To register:
Registrations are essential.

Learning outcomes
At the end of this session, participants should be able to:

- Summarise the benefits of the renewed National Cervical Screening
- Outline the new requirements for testing and pathology referral
- Recall the new guidelines for cervical screening
- Summarise the changes to the National Bowel Cancer Screening Program
- Produce appropriate referrals for NBCSP participants with a positive FOBT
- Implement the renewed National Cervical Screening Program in your clinical practice
- Implement the use of Health Pathways in your clinical practice

*Please note these learning outcomes are subject to change.

The General Practice Education Project is funded by the Department of Health Western Australia.
