

# Raise awareness about potential cancer hazards in Australian workplaces.

Get free resources on common cancer-causing agents at [cancer.org.au/workcancer](https://cancer.org.au/workcancer)

Cancer Council has designed resources for both employers and employees explaining common workplace carcinogens, how they can cause cancer, workplace legal obligations and how to reduce risk of exposure.

## What cancer-causing agents are included?

You can find information on diesel engine exhaust, silica dust, welding fume, asbestos, solar UV radiation, environmental tobacco smoke and more. Resources include:

- toolbox videos
- toolbox guides
- fact-sheets
- pocket guides
- posters
- e-modules
- workplace cancer compensation guide

New topics and resources are continually being added to the website. Email [workplacecancer@cancer.org.au](mailto:workplacecancer@cancer.org.au) to be notified when new resources are released.
