Overview

“Chronic illnesses are a major cause of global death and disability. Now with medical advances, people can be living extended periods of time with these life limiting illnesses, including renal and respiratory diseases.”

Sourced: Palliative Care and Nursing: A guide to Practice, 3rd Edition.

This case study based workshop will focus on understanding palliative care in chronic illness.

Learning areas

- General principles and physiology of chronic illnesses
- Referral to palliative care specialty
- Enhancing quality of life through symptom management
- Critical Points – advance care planning and communication

Facilitated and Presented by

Natalie Panizza, Palliative Care Nurse Practitioner

Invited Renal and Respiratory specialists
